

SUSTAINABLE
DIVIDENDS

value fund

Sustainable Dividends Value Fund

Invest with us in the best European companies for sustainable and growing dividends.

✔ Sustainable

Sustainable lasts longer, both for our world and for our capital.

✔ Dividends

When assessing an investment, dividends are very important.

✔ Value

We use a proven process for valuing companies.

Investing and contributing to solutions of sustainability issues?

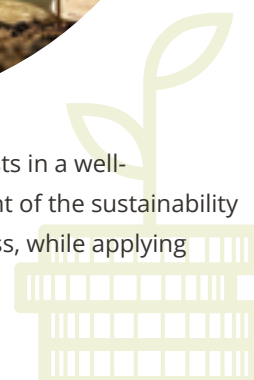

You want to make return on your assets. You also want to contribute to various sustainability challenges.

Investing in the Sustainable Dividends Value Fund will help you do just that.

The fund

Sustainable Dividends offers an investment fund that invests in a well-diversified portfolio of European companies at the forefront of the sustainability transition. Our focus is on a disciplined investments process, while applying both qualitative and quantitative financial criteria.

Testimonials

Harm Welleweerd

Former CEO iwell

Companies that see circular commodities and the clean energy transition as real opportunities have the best chances for successful growth. The Sustainable Dividends Value Fund focuses especially on this type of companies. This offers me greater certainty of returns and the chance to invest equity capital in accelerating the transition into a more sustainable society.

Michiel Langezaal

Co-founder and CEO Fastned

What really appealed to me about Sustainable Dividends is the story. First, we invest only in sustainable companies. Then, we look for companies that show an upward trend in dividend payments because companies with growing dividends have historically achieved above-average returns. A refreshingly simple and clear strategy that gives me confidence.

Bart van Asten

CTO of WorldACD Market Data

The Sustainable Dividends Value Fund invests in companies that take sustainability seriously. The fund is run by experienced people whom I have known for a long time and in whom I have great confidence. Those two factors ensure that I have been a participant in the fund for many years with peace of mind.

Conviction and investment process

We believe that sustainable investing does not have to come at the expense of an attractive return. In our fund, we choose listed shares of European companies that are profitable and demonstrate their social relevance by making a concrete contribution to the sustainable transition. This combination delivers more, both for investors and the world.

Investment case:

Medistim

- Norwegian medical technology company founded in 1984
- Globally active in equipment for bypass surgery
- Good references from renowned doctors

Business model

- Market share of more than 80% in a growing market
- Move to own distribution ensures rising margins

Financial health

- No debt on the balance sheet, but a net cash position

Shareholder interests

- Average annual dividend increase of 16%
- Management owns over 7% of the shares

Dividend

- Dividend growth almost every year for the past 20 years
- Recent dividend increase of 33%

ESG

- Medistim's equipment gives patients a better chance of survival during heart surgery

Valuation

- Undervalued stock compared to its own history and other companies in the sector

Investment specialists

Our team consists of investment specialists with long experience in the investment world.

Good cooperation strengthens the individual qualities of the team members. Expertise complement each other. The lines of communication are extremely short, allowing us to implement the decisions we take quickly. This ultimately leads to the best team result.
